Curborough Event, Oct 2016

October 2016, second event ran by us at Curborough Sprint Course. The available slots were filled in under an hour from initially putting the event on Facebook again, I just couldn't believe how popular the event had become.

This time around I would be taking part not only as organiser, but also driving which I was really excited about.

We again had another great day! The weather was still sunny, it wasn't too hot, all the cars behaved and everyone drove within their limits. I achieved a personal best of 1'32.44. Down from my previous 1'44.88. Just going to show how I was learning the circuit. My aim now is to get into the 1'31's.

In fact it wasn't just my times that improved; those people who came to Curborough for a second time had also improved. On average most people had improved by around 5 seconds a lap, considering how small the circuit is that's an impressive amount of time taken out.
